

When sending photos for

caricatures...

Please remember a couple of important things:

Quality pictures of the person(s) you would like drawn are crucial. Photos that are very small, too dark or washed out with light are useless when trying to draw a likeness. Also if the “subject” is frowning or has no expression the resulting art will reflect what I have to work with. The best way to think of gathering photos is to take “mugshot” style pictures -a front and side view of the subject- BUT SMILING!!!
